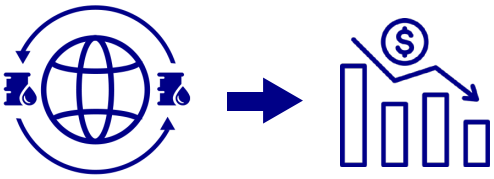
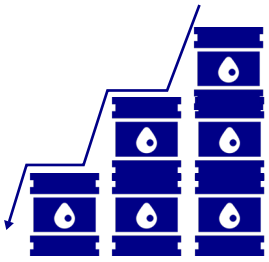
5 Key figures to understand fuel fraud in Africa

Oil is the number **1** most stolen natural resource globally. Between **5-7%** of the global market for crude oil and petroleum fuels is stolen every year

Illicit oil trade reach nearly **$100 billion** per year in Africa as a result of under-invoicing, theft, bunkering, and corruption.

The economic loss **$15 billion** from illicit trade reach exceeds every year for Africa





Nigeria, Africa's largest oil producing country loses **150,000 barrels** of oil a day to criminals who illegally tap pipelines in the Niger Delta region.

21.7 million liters of oil spilt between 2011 – 2017 in the Niger Delta, which makes it the most polluted region in West Africa
